

Upcoming Enterprise Incident Management System Enhancements

ODP Announcement 20-080

AUDIENCE:

Enterprise Incident Management (EIM) Users

PURPOSE:

To provide information and resources related to the EIM enhancements that will go live Saturday, June 27, 2020 as part of HCSIS release 65.05.

DISCUSSION:

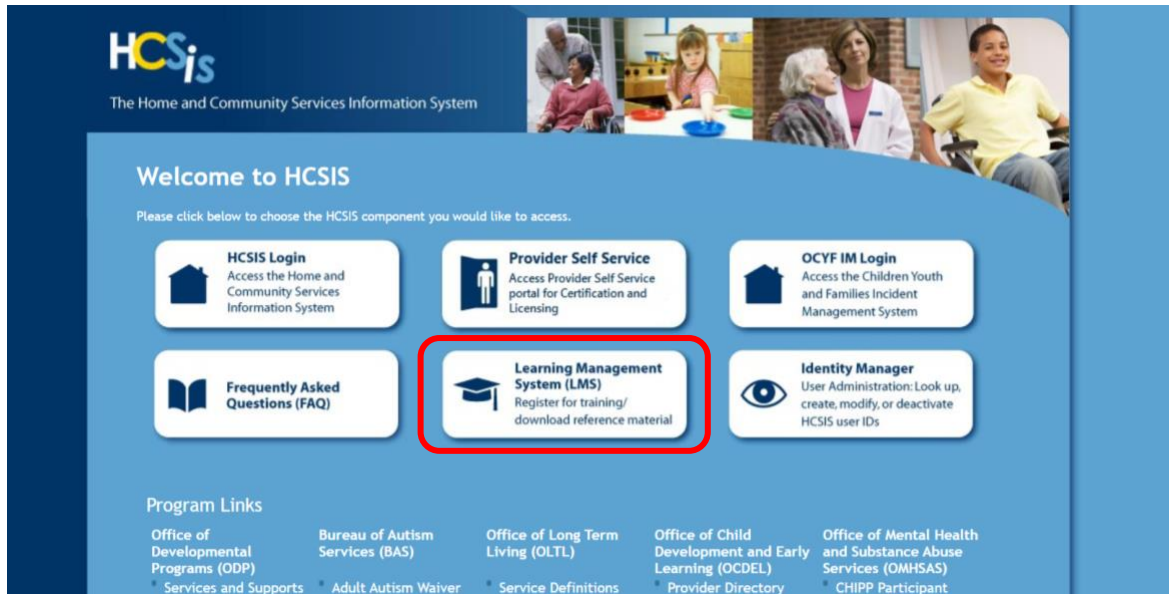

EIM is being enhanced to include new functionality that is intended to help improve record keeping and streamline communication. The use of this additional functionality is currently **optional**.

The new functionality includes:

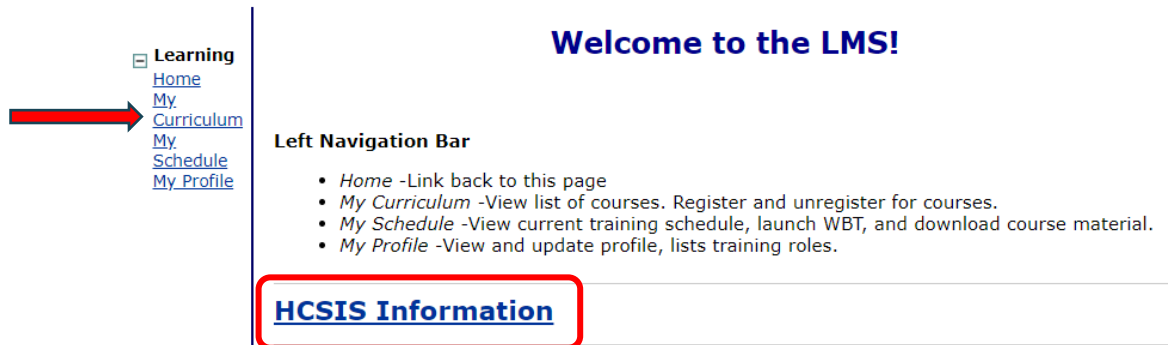

- Document scanning and uploading capabilities: Documents such as hospital discharge summaries, staff training records, evidence showing implementation of corrective actions, etc. can now be scanned and uploaded to become part of the incident report record.
- Incident Report Summary print option: An additional print option has been created to aid providers with achieving compliance with §§6100.401 (e) and 6100.404 (b) (1-6). This print summary option produces a condensed version of the incident report with enhanced formatting.
- Supports Coordination Comment functionality: Functionality has been created that allows Supports Coordinators to comment on incident reports that Administrative Entity/County Management Reviewers can view and address as warranted.

RESOURCES:

Additional information and reference materials can be found by logging in to the HCSIS Learning Management System (LMS). The link to LMS can be found on the HCSIS landing page.
