SUBJECT: Nursing Home Visitation - COVID-19 (***REVISED***)

Memorandum Summary

- CMS is committed to continuing to take critical steps to ensure America's healthcare facilities are prepared to respond to the Coronavirus Disease 2019 (COVID-19) Public Health Emergency (PHE).
- **Visitation Guidance:** CMS is issuing new guidance for visitation in nursing homes during the COVID-19 PHE, ***including the impact of COVID-19 vaccination.***

QSO-20-39-NH Revised: Indoor Visitation

Facilities should allow indoor visitation at all times and for all residents (regardless of vaccination status), except for a few circumstances when visitation should be limited due to a high risk of COVID-19 transmission (note: compassionate care visits should be permitted at all times). These scenarios include limiting indoor visitation for:

- Unvaccinated residents, if the nursing home's COVID-19 county positivity rate is >10% **and** <70% of residents in the facility are fully vaccinated;
- Residents with confirmed COVID-19 infection, whether vaccinated or unvaccinated until they have met the criteria to discontinue Transmission-Based Precautions; or
- Residents in quarantine, whether vaccinated or unvaccinated, until they have met criteria for release from quarantine.

Upcoming Revised Guidance

- 20-066 Guidance for Visitation in Residential Settings
- Guidance on COVID-19 for Personal Care Homes, Assisted Living Residences and Private Intermediate Care Facilities

Individual Transition Tools Updates

- Update to reflect distinction between re-opening last summer and post vaccination re-engagement
